

# XOUT VIRUS PRO

Bio-Decontamination System —

The presence of pathogens or other microorganisms can compromise the safety and quality of the products and environments in many industries. Using vapor-phase hydrogen peroxide ( $H_2O_2$  V-Phase) as a cold sterilizing agent, XOUT VIRUS PRO achieves high levels of sterilization quickly, safely and effectively. XOUT VIRUS PRO is the most technologically advanced, effective, rapid  $H_2O_2$  bio-decontamination system.

This makes XOUT VIRUS PRO to be extensively used worldwide to remove airborne and surface microbiological contamination in controlled or classified environments.

## XOUT VIRUS PRO SPECIFICATION SHEET

ITEM	DESCRIPTION	
Max Treatable Volume*	Up to 100 m <sup>3</sup>	
Blower Airflow	Max 120 m <sup>3</sup> /h, Adjustable	
Peristaltic Pump	1~10 g/min, Adjustable	
Dimensions	Overall	W 270mm x H 280mm x L 480mm
	Weight	15 Kg
Sterilization Agent	Hydrogen Peroxide Solution (30~50 %)	
Electrical	220~230 V, 50/60 Hz, Single Phase, 1 kVA (Max.)	
Materials	Stainless Steel AISI 304
